

Ethos Markets

A DeFi liquidity provider that aligns our incentives to those of your token project, helping you build a strong community

- **Healthy Partnerships**
- **Optimized on-chain liquidity**
- **Token Accumulation**

Redefining Market Making

Conventional market making has historically been unreliable, off-chain, and placed an undue burden on token holders' communities.

Our mission is to create a new ethos surrounding liquidity provisioning in DeFi. We borrow tokens and align our incentives to share in our project partners' growth.

Project Alignment

Instead of using sale options on your tokens, we actually accumulate them on our balance sheet.
